MPROVED ROTARY COOKING STOVES. On or about the 1st Sept.
next, the subscriber will receive and offer for sale
in this village, THIRTY "Improved Rotary
Cooking Stoves." That the Rotary Stove is better for purposes of cooking than any other yet invented, there is no doubt. The top revolves on
rollers horizontally, by which means the flame
strikes every pot, kettle and pau used on it, directly. By a new and peculiar construction, the
oven is so made es to bake meat, bread, cake and
pios, with uncommon uniformity; a result of no
small consequence to all who eat of such articles.
With the above excellencies, is combined a rare
economy in fuel.

Mr. Morse : Mr. Morse:

Sir—Having carefully examined "The American Class. Reader," by Grorer Wilson, I hesitate not to express my opinion decidedly in its favor; because I deem it a work chaste in its selections, classical in point of diction, and admirably calculated to assist youth in becoming correct readers. I hope that it will be universally adopted in our schools.

our schools.

I have also examined your "Practical and Theoretical Arithmetic," by the same author, containing several new methods of operation, and a new system of proportion; and hesitate not to say, that it is the best work I have seen of the kind.

Mr. Morse:
Sir—I have very carefully examined "The American Class-Reader," by "Geonge Wilson," and have no hesitation in expressing my opinion of its excellence. I consider it the best work, for the purpose for which it was designed, that I have ever seen. I am confident it will be foundeminent. It beneficial both to Teachers and Papils; and cannot but desire its immediate adoption in our Academies and Schools.

THE AMERICAN CLASS READER: containing a series of lessons in Reading; with Introductory Exercises in Articulation, Inflection-Emphasis, and the other essential elements of correct natural Elecution: designed for Academies and common Schools. By George Witson, formerly Principal of the Canandaigua Academy, and late Principal of the Livingston Co. High School.

The design of the American Class-reader, is to teach scholars to read. It is not sufficient for this purpose, that a book be instructive and entertaining, and the selections chaste and classical in point of diction; it should be also properly adapted to exercise the reader in all the varied tones, inflections, and other requisities that belong to correct clocution.

tions, and other requisities that belong to correct elocution.

Four lessons are inserted without punctuation. These will furnish tests of the degree of intelligence, and of attention to the sense, with which the pupil reads. They may also be used in teaching punctuation, and the use of capitals.

A considerable number of lessons have been selected from the Bible. Apart from the importance and value of its divine instructions, the Sacred Scriptures abound in passages unrivalled in natural impressive eloquence, and admirably adapted to the purpose of improvement in elocution. In what is called rhetorical dialogue, selections can no where else be found at all comparable.

A PRACTICAL AND THEORETICAL SYSTEM OF ARITHMETIC, containing several new methods of operation, and a new system of Proportion; with Theoretical explanations of all the principal rules. Also, a treatise on Mensuration, and a brief practical system of Book-keeping. By the author of the American Class Reader.

["This system of Arithmetic is designed for the more advanced pupils in common Schools and Academies. It does not attempt to combine men tal arithmetic with the use of the slate, nor to units in one book a treaties for children of six, and for youths of sixteen years old. In mental arithmetic, every thing that could be desired, has been done by Colburn whose admirable little work is now so generally used and highly appreciated throughout the United States."]
